

6-pack: Shingijutsu – KAIZEN#3 – Improvement of shop processing time for NNC

Business Impact of the Project

Operational

Serviceability rate of parts

Respect of commitments

Customer satisfaction in compliance with the contract

Financial:

Reduction of parts holding costs

Operational Objectives

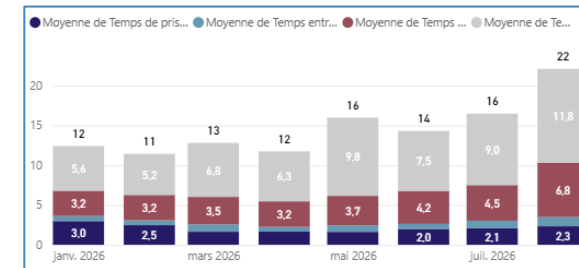

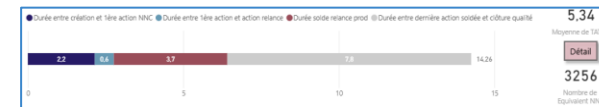

KPI (Metric / Indicator)	Current	Target
Average SPT for NNC	5,3 days	2 days

Planning

Kick-off: ✓	26/06/2026	Define: ✓	30/07/2026
Measure: ✓	30/08/2026	Analyze: ✓	30/09/2026
Improve: ✓	16/10/2026	Control: +30 / 60 / 90 days	

Problem Description

- ✓ Currently, the average overall processing time for a NNC is 5.3 days. This processing time is too long to ensure on-time delivery of the parts (31 days for reworked parts).

Scope

What is in Scope?

- ✓ Nozzle and Blade CFM56 & LEAP ; Parts oriented to PNR; Y6 for non-conformity laboratory

What is out of Scope?

- ✓ Parts with CSC case (2%) ; Y7 sample labo
